

Bindomatic covers

Document binders – part of the Bindomatic system

Behind every professionally bound document there is a hard-working document binder. Bindomatic has a range of machines to cater for your company's every need. All of them produce attractive, durable documents – but they vary in capacity and operation.

Bindomatic 1000

A manually operated machine with all the features of a good binder – but it fits into the tiniest space! The great advantage of this machine is being able to have it within arm's reach. The Bindomatic 1000 binds documents with a spine width of up to 12mm, and is ideally suited for the home office, or as a complement to one of our larger, automatic binders.

Bindomatic 5000

A manually operated powerhouse of productivity, binding documents with a spine width of up to 54mm. In addition, you can choose to bind documents in a variety of formats, such as A5, B5, A4, A3 and printouts measuring up to 370 mm in length. The Bindomatic 5000 can be successfully used on its own, or as a complement to our larger, automatic binders.

Bindomatic 101 DFS

Producing large numbers of documents? In that case we would recommend one of our automatic binders. The smallest of these, the Bindomatic 101 DFS, is fast and simple to use and binds up to 1,600 documents per hour. This is a reliable and user-friendly machine – automatic processes include paper jogging, heating and cooling. The bound documents are ready to flick through immediately.

Bindomatic 301 DFS

Our largest binder has a capacity of up to 100 bound documents in three minutes. Such an impressive volume in short space of time is unique in its class. The Bindomatic 301 DFS will load the set of paper into the cover for you - no more manual insertion required. Documents are ready to flick through immediately, as both heating and cooling processes are handled automatically.

Technical data: Bindomatic covers

BINDING: Durable glue strip, specially designed by Bindomatic

SPINE WIDTHS: Spine widths from 1.5-54mm (A4)

NUMBER OF SHEETS PER COVER: Between 1 and 540

Other formats and spine widths as required

Making a professional impression since 1974

Bindomatic was started in 1974 and provides companies and organisations with the right tools to make a professional impression. The concept involves the production of attractive covers, in which documents are bound using technically advanced binders.

Bindomatic head office is located in Stockholm, Sweden, with subsidiaries in Germany, USA and Portugal. Sales and distribution in the rest of the world is managed by independent distributors in some 40 different countries.

BINDOMATIC®

A professional impression.

You never get a second chance to make a first impression

There is a saying that 'an audience takes four seconds to judge a speaker'. The opportunity to make a first impression will never come again. So, if you have put your heart and soul into a project, an important presentation, for example, here is an invaluable tip: Put a little effort into making an entrance as well.

Creating a professional impression is easy, and at Bindomatic, we give you two choices in your approach. Standard covers or customised ones to reflect your corporate logotype and colours – choose the best one for you, whatever the situation.

BINDOMATIC®

A professional impression.

Creativity “off the shelf”...

Smart, neat and timeless – The Bindomatic standard cover keeps papers together, is durable, and gives a professional impression in the easiest way imaginable. Our standard covers are available in three popular styles: Bindomatic Classic, Bindomatic Aquarelle and Bindomatic Ambassador.

Bindomatic Classic

The Classic cover, ensuring your documents stay neat and smart-looking. A discreet, white, paper cover with a crystal clear, PET plastic front. Nothing more, nothing less.

Bindomatic Aquarelle

The colours and paper quality do all the talking for this cover. The texture of the paper resembles linen and the front is made from transparent, matt PET plastic. Choose from eight elegant colours: graphite, white, burgundy, black, blue, dark blue, grey or dark green.

Bindomatic Ambassador Print-On-Demand

For your premium documents. The exclusive Bindomatic hard cover in leather texture with inner cover in matching colour. Simply print your artwork on the self-adhesive front label included and create that unique cover of your own.

When you use a Bindomatic cover, the paper edges are as even as in a book.

Bindomatic Aquarelle covers are available in grey, graphite, dark blue, burgundy, dark green, black, blue or white.

A company's logotype and colours should also be reflected in documentation produced in-house.

A one-colour, bleed print, customised corporate cover with die-cut window.

...or a cover which has been specially designed to reflect your corporate profile?

Identity and belonging is becoming increasingly important in our modern information society, and this is especially true of a company's visual identity. Consistent use of corporate logotype and colours is an important factor in giving clear signals to our surroundings. Everything conveys a message.

Documentation published in-house tends to lack uniformity of appearance and can often create an inconsistent impression. That is where Bindomatic's customised corporate covers come into the picture.

Customised covers to your specification

Covers which reflect your company's corporate identity – perhaps with a specially designed window, your favourite colour, or special paper to express the company's individuality. Your options are virtually endless when it comes to Bindomatic's customised corporate covers – the aim is to tailor the product in a way that is perfect for you.

Just like a bound publication, straight from the print shop

When our customers first receive their customised corporate covers, there are primarily two things that tend to impress them – the covers have the feeling of a real, bound 'book' and the finished result is as neat and smart as if it had come out off a print shop. What is more, all of this can be done in an instant, at the office!
